Cr System			
Max	*CRITERIA*	*GRADE*	*COMMENTS*
100	**GitHub**	90	-Structure is not correct, folder 07 must be named "Other" -The document "Object list.pdf" does not exist
20	**Problem Definition**	15	-the commercial premises for which the project is developed is not specified
20	**Object List**	15	-The list of objects does not correspond to the name of the classes
20	**Use Case Diagram**	12	-There is no relationship between the ones diagram and the class diagram -The actors and actions within the diagram are poorly defined -Why is there only the association relationship?
50	**Class Diagram**	23	-Lack of dependency relationship between Supiler and article -InvoiceDetail dependency relationship missing with person and bill -The relationship between the classes is inconsistent, not all are associations
20	**IEEE 830**	15	-There is no leader within the developers

			-Group logo missing -The presumption of the project does not correspond to the description
20	**Letter of Intent**	20	--------------
50	**Code Constancy (Inspection)**	40	-The name of the arrays being "ArrayList customer" not "ArrayList listcostumer" -Supplier is not a method, it does not have a verb and a class with the same name already exists
20	**Validation (System vs UC vs IEEE 830)**	18	-The methods within the Suplier and Invoice detail class do not correspond to the class diagram
100	**Verification (Running + JsonFiles)**	50	Do not have json file
